 IDENTIFIERS Australia; *Educational Systems; Luxembourg; Switzerland

ABSTRACT

This volume is one of a series intended to provide a comparative view of the education systems of all Organization for Economic Cooperation and Development (OECD) Member countries. It complements an OECD handbook entitled Methods and Statistical Needs for Educational Planning (see ED 023 171). The document is based on the need to establish a conversion key for member countries so that published national data can be readily converted on the basis of a standardized system, as proposed in the handbook. The purposes are to assist OECD Member countries in the development of their educational statistics and to provide a basis for the collection of internationally comparable statistics on educational systems and programs. In this volume, the educational systems of Australia, Luxembourg, and Switzerland are classified by type of education or institution: Preprimary, Primary, General Secondary, Technical Secondary, Teacher Training, and Higher Education. The information requirements, qualifications conferred, organization of studies on a full-time or part-time basis, and other information of possible interest are presented. A glossary of terms used in the OECD classification is provided. (Author/JR)

 * Documents acquired by ERIC include many informal unpublished *
 * materials not available from other sources. ERIC makes every effort *
 * to obtain the best copy available. Nevertheless, items of marginal *
 * reproducibility are often encountered and this affects the quality *
 * of the microfiche and hardcopy reproductions ERIC makes available *

PARIS 1975**

00004

The Organisation for Economic Co-operation and Development (OECD) was set up under a Convention signed in Paris on 14th December, 1960, which provides that the OECD shall promote policies designed

- to achieve the highest sustainable economic growth and employment and a rising standard of living in Member countries, while maintaining financial stability, and thus to contribute to the development of the world economy,*
- to contribute to sound economic expansion in Member as well as non-member countries in the process of economic development,*
- to contribute to the expansion of world trade on a multilateral, non-discriminatory basis in accordance with international obligations.*

The Members of OECD are Australia, Austria, Belgium, Canada, Denmark, Finland, France, the Federal Republic of Germany, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States

INTRODUCTION

The present volume is one of a series intended to provide a comparative view of the education systems of all OECD Member countries. It is a complement to the earlier OECD "handbook" for educational planners Methods and Statistical Needs for Educational Planning which was published in 1967; one of the conclusions of which was the need to establish a "conversion key for all OECD Member countries so that published national data can be readily converted on the basis of the standardized system" as proposed in the above publication*.

The purpose of both the "handbook" and this classification is to assist OECD Member countries in the development of their educational statistics and to provide a basis for the collection of internationally comparable statistics.

In fact, although education is first and foremost a national concern, the problems experienced in the development of educational systems are often similar in a number of countries. For this reason, it may be useful to compare different countries' solutions to specific problems. But for such comparisons to be valid, they must be based on common terms of reference; the statistics must, insofar as possible, have the same meaning in the various countries concerned.

For the statistics published by national authorities to be used as a basis for inter-country comparisons, a classification system and a set of definitions must be adopted which are acceptable and applicable to all the countries interested in making such comparisons.

Efforts have been made in various OECD studies to publish statistics on as comparable a basis as possible; no classification of education systems in their entirety has yet been established. The preparation of such a classification for OECD Member countries was included in the programme of the Committee for Scientific and Technical Personnel which has recently been replaced by the Education Committee.

* This publication was endorsed by the OECD Council "as a suitable framework for the compilation of comparable educational statistics".

The "handbook provides the basic analytical framework and rationale for the classification; the present study shows in detail how the different parts of each country's education system are related to the reference frame in the "handbook". It is intended to be a guide to anyone who wishes to compare or understand the structure of the education system in OECD Member countries.

To establish a conversion key for the different countries, we have to start with the national classification of each country; in principle, only those types of education or institutions which are explicitly treated in national statistics are included. The degree of detail in published statistics varies enormously from country to country, and this explains the divergence in the size of the entry for different countries in these volumes. Where appropriate, and when the information was available, other types of education have also been mentioned.

The next step was to compile maximum information on these different types of education so as to assess them qualitatively. The evaluation criteria included length of studies, admission requirements (i. e. previous schooling), qualifications conferred and the possibility of transfer to other types of education, organisation of studies on a full-time or on a part-time basis, and any other information of possible interest to potential readers.

On the basis of this information, each type of education or institution has been reclassified under the OECD system, both from the standpoint of standardized designation and in terms of its position on the educational ladder by year of study.

Since education is now being extensively reorganised in many countries, the present study attempts to present the existing situation but also to give an indication of changes which have occurred during the past ten years.

While the present classification is valid for the situation at the date mentioned for each country, it may no longer hold for the new educational structures and concepts towards which some countries are already moving: for example, the discontinuance of the notion of levels and grades, continuing or recurrent education, etc. These changes will be taken into account in future revisions of this classification.

Since educational statistics in most countries are still cast in a national mould which reflects traditional administrative needs, it is hoped that this conversion key may help to promote a better mutual understanding of the systems in the different countries, permit the compilation and presentation of comparable statistics and enable each country to identify easily what is covered by each aggregate presented in a particular study.

DEFINITION OF TERMS USED IN THE OECD CLASSIFICATION*

This is a classification by type of education and not by institution providing education. In fact, pupils of the same institution may, depending on the section or options chosen, take a general or vocational course, a course preparing them for higher studies, or a terminal course. Only the different types of education are suitable for inter-country comparison. A case in point is that of the universities: as educational institutions they may provide, in addition to courses leading to the officially recognised first university degree, courses of shorter duration leading to qualifications below first-degree level and comparable to those awarded by higher education institutions not having university status. Conversely, non-university institutions may award the equivalent of a university degree.

Pre-primary

Non-compulsory education preceding entrance into primary education.

Primary

Compulsory general education for all pupils. In systems providing a comprehensive-type education for all pupils which covers all or part of their compulsory schooling, only those years in which there is no differentiation (in the form of subject options) have been regarded as primary education.

General secondary

Education which is not direct preparation for an occupation.

Technical secondary

Education designed as direct preparation for an occupation or trade.

* For further details of this classification, the reader is referred to Chapter IX of Methods and Statistical Needs for Educational Planning, OECD, 1967.

Secondary (a)

General or technical education offers pupils, upon completion, a relatively good chance of continuing their studies in a higher education establishment.

Secondary (b)

General or technical education, after which pupils have little chance of continuing to higher education.

This separation of secondary education into types (a) and (b) seems preferable to the frequently-used division into lower and upper levels or 1st and 2nd cycles because in more and more cases the lower level is common to all pupils (although sometimes composed of different sections) and only at the end of this period do pupils receive final guidance and make definitive choice concerning their future schooling.

Teacher training

Preparatory training for the teaching profession.

Non-university type higher education*

Higher education leading to a specific qualification, often occupational and, unlike the first university degree, generally not offering the possibility of pursuing doctorate or other post-graduate studies.

University type higher education*

The length of the different types of education varies from country to country. It was therefore considered advisable to specify the corresponding years of study in the educational scale so as to permit any regrouping necessary for inter-country comparisons.

* Where it has not been possible to make the distinction between non-university higher education and university higher education as defined here, the level of the degree awarded at the end of the different types of studies has been specified: below first-degree level, intermediate diploma (usually preparatory to first degree), first or basic degree, higher degree (above first degree), doctorate.

AUSTRALIA

(March 1974)

Compulsory schooling: 9 or 10 years,
from the age of 6 to 15 or 16 according to the State

00010

AUSTRALIA

10

Each of the six Australian States has a Minister of Education and a Department of Education which, respectively, represent the political and administrative arm of the State Government in the field of education. The State governments have the primary responsibility for all aspects of their school systems, and because of this there are distinct differences in organisation, types of schools, examination systems, the transfer from secondary to vocational education, and the recruitment and utilisation of teachers. In the two Australian Territories, the Australian Capital Territory and the Northern Territory, the educational system is the direct responsibility of the Australian Government, which financially supports all educational systems in Australia through capital and recurrent grants and assistance schemes for students.

There are, in all States, primary and secondary government schools in which tuition is free and private schools which are mainly denominational and which charge fees. By 1975 all external examinations at the junior secondary level, taken at the end of the third or fourth year of secondary education will be replaced by systems of internal assessment. The senior secondary level examination taken in the final year and used for matriculation purposes is still retained in all States except one. However, there is a trend towards the abolition of external examinations at this level also.

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	D.E.C.O. Classification	
						Type of Education (7)	Years of Study (8)
1. Pre-primary education	Under 6	Variable			The majority of these schools are run by non-profit organisations, but all now receive some financial assistance from State governments. Grants are available for teachers' salaries and, in some areas, towards buildings and equipment. In one State pre-schools are run by the State Education Department. In the Australian Capital Territory and the Northern Territory, the Australian Government provides pre-school centres and employs the teachers, but parents assist in the provision of equipment. The Australian Government has established a Pre-Schools Commission to examine the allocation of expenditure to ensure that, over a period of approximately six years, all children are given an opportunity to undertake at least one year of pre-school education. These schools are not currently included in the regular statistics compiled by the statistical services;	Pre-primary	
1.1. Pre-school centres not attached to primary schools	Varied				Though school attendance is not compulsory until the age of 6, most children begin school before that age. In one State, kindergarten are attached to primary schools and are attended for one year before entry into Grade I. Throughout Australia, schooling between 5 and about 8 is usually referred to as Infants School.	Pre-primary or preparatory	
1.2. Kindergarten attached to a primary school	1-2 4-5 years old	Generally 4-5 years old					

Type of Education or Institution	Length of Study (in years)	Entrance Requirements	Certificate	Full/Part Time	Other Information		O.E.C.D. Classification
					Type of Education	Years of Study	
2. <u>Primary Education</u>	Australian Capital Territory, New South Wales, Tasmania, Victoria	Generally 5 years of age	No certificate, progression to secondary school is automatic	Full time	Irrespective of the size or the location of primary schools, standards of tuition in a given State are similar, as teachers have received similar training and teach in both rural and metropolitan areas. Each State Education Department prescribes syllabuses of instruction, but teachers have discretion to adapt them to local circumstances and to pupil abilities. In general, one teacher is in charge of a class and teaches all, or most, subjects on the syllabus.	"	Primary 1-6
	Northern Territory, South Australia, Western Australia, Queensland	7			In the first place it should be pointed out that the distinction presented below between 1st and 2nd cycles secondary schools has been made for purposes of international comparison and do not always correspond to the existing situation. In fact, depending on the State or the area, secondary education can be provided:		1-7

3. Secondary education

- (a) in primary/secondary schools gathering children from the beginning of compulsory schooling till the age of 15 approximately. This situation is becoming rather uncommon.
- (b) secondary schools providing both 1st and 2nd cycles and enrolling children of about 11-17. This situation is quite usual.
- (c) separate secondary schools for 1st and 2nd cycles.

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	Type of Education (7)	Years of Study (8)	O E C O Classification
1. 1st cycle secondary	Completion of 6 or 7 years primary school according to the State			Full time	In addition to the study of basic subjects begun in primary school, the curriculum include elective subjects such as foreign languages, technical or commercial subjects and more specialised studies in arts, natural and social sciences and mathematics.		7-10	Secondary General (a) or (b)
Australian Capital Territory and New South Wales	4				Government school students usually attend local schools, but private school students frequently travel out of their area of residence. The choice of school and course is usually based on general ability tests, results obtained in basic subjects and parents' and students' wishes.		8-11	
Northern Territory and South Australia Tasmania	4		School Certificate		In the past, there were several types of secondary schools providing different types of education, but at present although agricultural, commercial, technical and selective high schools still exist in some States, the trend is towards grouping pupils in one comprehensive school where, in addition to a core curriculum usually consisting of English, mathematics, social studies, and one or more sciences, they can specialize in subjects best suited to their abilities and interests. Physical education and sport are part of the curriculum and most schools participate in regular inter-school matches. Co-education is usual in State secondary schools and is being introduced in the private sector. Most secondary schools are now equipped to teach domestic science commercial subjects, woodwork and other technical subjects and in some cases agricultural subjects. Examinations are organised on a state level. The 1st cycle secondary leaving certificate gives access to vocational classes in technical colleges, nursing or secretarial courses or to junior		7-9	
Queensland	3		Leaving Secondary School certificate				8-10	
Western Australia	2		School Certificate (Preliminary)				8-10	
3. Senior high or 3rd cycle secondary			Junior Certificate	Full time			7-10	
Australian Capital Territory and New South Wales	6	Successful completion of 1st cycle	Higher School Certificate/Matriculation				11-12	
Northern Territory and South Australia Queensland Tasmania	1		Matriculation/ Secondary School Certificate				12	
	2		Senior Certificate				11-12	
	1 or 2		Matriculation (Internal)				11 or 10-11	
		"	" Higher School Certificate/Matriculation					

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	O E C D Classification (7)	Years of Study (8)
Victoria	6	No 1st cycle certificate	Higher School Certificate/Matriculation		posts in commerce, industry or public administration. The 2nd cycle secondary leaving/Matriculation certificate gives access to teacher training colleges, colleges of advanced education, and universities provided that the candidate has passed in the subjects or groups of subjects required by the particular institution. In most States the 2nd cycle examinations are controlled by a board comprising representatives from the Education Department, the universities, private schools and teachers' organisations. Pupils attending private schools must take the public examinations organised by the State. There is a present trend towards examinations being replaced by school assessments for entry to such institutions.		7-11
Western Australia	3	Completion of 1st cycle	Leaving Certificate and Matriculation		In Some States, pupils leaving school without obtaining the leaving certificate receive a school-attendance certificate from the Principal.	This section refers only to the vocational training given in institutions other than comprehensive secondary schools.	11-12
4. Vocational and technical education	to 3 to 4 years	In general successful completion of 3 to 4 years of secondary school	Apprenticeship certificate	Part time or block release	Theoretical and practical training are designed to supplement practical experience acquired on the job. On starting the apprenticeship the student must enrol in the appropriate trade course given by a technical college. Instruction is usually given during working hours; hours per week vary from 8 to 10. The organisation of studies takes into account the level attained by students in secondary education.	Technical secondary (b)	Range of from 10-15

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	D.E.C.D. Classification (7)	Type of Education (8)	Years of Study (9)
4.2. Certificate courses	2 full time to 7 part time	Vocational competence certificate or certificate entrance examinations, or completion of appropriate trade course		Full time or part time	These courses are designed to prepare students for technical occupations and in some cases for diploma courses. They can be either full-time or part-time courses or a mixture of both systems. Candidates may be required to have passed examinations in certain specific subjects at the school certificate level. Courses cover such subjects as shorthand, typing, arts, accounting, industrial electronics, wool grading and architectural drawing.	Technical secondary (b)	Technical secondary (b) or higher unit	Range from 11-18
4.3. Diploma courses	3 or more	Minimum is completion of 1st cycle secondary certificate plus entrance examination, or successful completion of secondary schooling, or completion of approved certificate course	Diploma	Full time or part time	The average length of a full-time course is three full-time years but variations are common. The course includes both lectures and practical work in laboratories and workshops. A great variety of subjects is taught in the following areas: art, architecture, business management, engineering, agriculture, pure and applied science, pharmacy and library science. A few qualifications are awarded only after acquiring one year's practical experience in the occupation concerned. Diploma courses are also available to graduate students. Schools and sections giving diploma courses are increasingly being transformed into colleges of advanced education.	Technical secondary (b)	Technical secondary (b) or higher unit	Range from 11-18
4.4. Other technical courses	Variable	No award	Variable	Variable	Most technical colleges also organise usually post-graduate, post-certificate and part-post-trade courses or short-term refresher courses as well as courses of general interest such as manual arts, motor mechanics, etc. Some of them provide training on some aspects of agriculture, and general secondary courses to prepare adults for the school leaving certificate or higher school certificate/Matriculation or other public examinations.	Adult education

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/ Part Time (5)	Other Information (6)	OECD Classification	
						Type of Education (7)	Years of Study (8)
4.5 Technical correspondence courses	Variable	The same as for regular courses	The same as for regular courses	Variable	Each State has set up a system of technical correspondence teaching to enable students in rural areas to continue their studies. Practical construction is given either in technical colleges during sessions held once or twice a year or in mobile workshops set up for a certain time in various local areas.	Higher university or non-university	1-12
5. Agricultural education	2-3	Successful completion of 4, 5 or 6 years of secondary schooling	Diploma in agriculture or in the special field studied. Certificate in agriculture	Full time or part time	All States offer training in agricultural science at degree level in universities, and at certificate and diploma levels in colleges of advanced education and agricultural colleges in all States except Tasmania.	Special	Variable
6. Special education	Variable	Variable	Full time	Physically or intellectually handicapped children are educated by both State authorities and by Church and voluntary organisations, often working together. In some instances, when residential schools are necessary, educational facilities and teaching staff are supplied by a State education department while a voluntary organisation provides living quarters and accepts responsibility for welfare. Some financial assistance from the Australian Government is also available.	Variable	Full or part time	Correspondence schools have been established in each State capital to cater for the needs of students who, because of geographical isolation from schools, sickness or for other reasons
7. Other kinds of primary and secondary education	Variable	Variable	Variable	Oct 16	Primary or secondary	1-12	
8. Correspondence schools	Variable	Variable	Variable	Oct 16	Primary or secondary	1-12

	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
7.2 Schools of the Air	Variable	Variable	Variable	Full or part time	cannot attend an ordinary school. They initially provided only primary education but it is now possible to complete a primary and secondary course up to matriculation standard.	1 - 12	Primary or secondary	13 - 15
8. Teacher training					Full or The Schools of the Air are an attempt to give geographically isolated students a little of the atmosphere of ordinary school life and to provide a useful supplement to correspondence courses. There are at present twelve such schools which enable students to talk to teachers by the use of two-way radio equipment.			
8.1 Teachers colleges					All State Government teachers colleges have now become accredited colleges of advanced education. Primary teacher education is also conducted in universities and a number of private and denominational teachers colleges. Student teachers generally do periods of supervised teaching practice each year.			
8.1.1 Primary teachers		According to success in 2nd cycle secondary leaving certificate (success in English is obligatory)	Primary teachers certificate	Full time	All State government teachers colleges Higher non-university			
8.1.2 Secondary teachers	4-5	Secondary school leaving certificate of the level required for university entrance	Secondary teacher's full time degree plus diploma of education	Full time	Secondary teachers usually undertake university studies in addition to professional training. They are normally specialists in a combination of subjects such as English and history, modern languages, mathematics and science. Professional preparation includes practice teaching under the supervision of teachers college or university staff and the observation of demonstration lessons.			

AUSTRALIA

17

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	OECD Classification (8)
3.1.3 Specialist teachers (music, art, manual arts, domestic science, nomenclatural subjects)	3-5	Usually in terms of success in 2nd cycle secondary leaving/matriculation certificate	Teacher of specialist subject	Full time	The length of studies varies according to the institution concerned and the type of school in which the teacher is to serve. In several States, the shorter courses are provided wholly by teacher education institutions.	13 - 15/17
3.1.4 Physical education teachers	Full time or part time	Secondary leaving certificate/ matriculation	Physical education teacher	Full time or part time	Courses for physical education teachers are offered in universities in most States, and in at least one teacher education institution in each State.	13 - 15
3.2 Pre-school teachers colleges	3	According to success in leaving certificate/ matriculation	Pre-school teacher's certificate	Full time	All institutions of this kind are private, conducted by Kindergarten Unions and similar bodies, except in the State of Tasmania where there is a government institution.	13 - 15
3.3 Colleges of Advanced Education	3 or more	Secondary school leaving certificate/matriculation	Associate diploma (university or non-university), First degree, Post-graduate diploma, Master's degree, Advanced certificate	Full time or part time	In 1965 the Committee on the Future of Higher Education in Australia recommended the diversification and development of higher education. As a result some existing technological institutes were developed as colleges of advanced education, and new colleges were formed. All State teachers colleges have now become Colleges of Advanced Education. The tuition they provide is a more vocational and practical emphasis and is more directed towards industrial and social requirements than tuition generally given in universities. Some cater for a wide range of vocations, others are specialist institutions. The type or types of tuition provided by a specific college are largely evolved in terms of the specific needs of the area in which it is located.	13 - 15
		- Agriculture				
		- Applied sciences				
		- Art and design				
		- Building, surveying, architecture				
		- Commercial and business studies				
		- Engineering and technology				
		- Liberal studies				
		- Music				
		- Para-medical				
		- Teacher education				

At present, in 1973, the Australian Government finances these institutions on a dollar for dollar basis for capital expenditure, and a dollar for

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	D.E.C.O. Classification (8)
						Type of Education (7)
					\$1.85 for recurrent expenditure available from State grants and students' fees. However, from 1974 the Australian Government will assume the responsibility of financing of tertiary education. Tuition fees will be abolished and a new student assistance programme introduced. There will be appropriate adjustments in financial arrangements with the States.	
					For part-time students the duration of these studies is longer than the 3 or 4 years of full-time students, and they are thus able to acquire currently some professional experience which may also be required of full-time students. Some colleges offer external tuition by correspondence.	
					The Australian Council on Awards in Advanced Education was set up in December 1971 to develop systems whereby the levels of the different colleges and the qualifications they award will be comparable and consistent but not necessarily uniform. Transfers between universities and colleges of advanced education are possible and studies already completed in one or the other kind of institution are taken into consideration. The decision to give credit for studies completed elsewhere rests with the institution concerned.	
10. Universities	3 to 6	Matriculation. Each university has its own rules concerning the number of subjects, as well as the level required.	Bachelor's degree Master's degree Doctorate Diploma of Education	Full time or part time	Australian universities are autonomous institutions with their own administrative council or senate. From 1974 universities, colleges of advanced education, teachers colleges and technical colleges offering tertiary courses will be financed as described in section 9 above.	

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/ Part Time (5)	Other Information		D.E.C.O Classification (6)
					Type of Education (7)	Years of Study (8)	
					As the number of new students admitted each year is limited in most universities, candidates seeking admission generally have higher qualifications than the basic requirements.		
					The length of studies for a first degree varies according to the faculty and according to whether students are full or part-time. The various subjects offered can be studied either as majors in which case they appear on the syllabus of each academic year, or as minors, involving only one or two years' study. Every first degree must consist of at least one major.		
					Universities also organise courses leading to qualifications (diplomas and certificates) at non-university or post graduate level, although the non-university level qualifications are almost completely phased out.		
					Some universities provide external tuition for students (part-time) who cannot attend lectures, except for short vacation schools/tutorials. External students take the same examinations as on campus students.		
11. Other Kinds of specialised education	3 to 4	Diploma (non-university level). Same conditions as for university entrance except for diploma courses + for which matriculation is not required	Bachelor's degree	Full time and part time	Diploma (non-university level). Same conditions as for university entrance except for diploma courses + for which matriculation is not required	Higher non-university or university or university or university	
11.1 Conservatoria of music	3 to 4	1 to 2 or 2 to 4	Master's degree	1 to 2 or 2 to 4	Master's degree	Canberra School of Music which is the responsibility of the Australian Department of Education and which offers a four year full-time diploma course of practical and theoretical studies.	
			Doctorate

Teachers	Place of Training	Length of Study (in years)	Other Information
1. Pre-School centres	Pre-school Teachers Colleges of Advanced Education (Tasmania) Universities	3 4	<p>Most pre-school teacher education institutions are run by private organisations, such as Kindergarten Unions and denominational organisations. The Australian government makes funds available for grants to students in these institutions and as from 1974 fees for students in approved institutions will be paid by the Australian Government. The secondary school leaving certificate/matriculation is the usual entrance prerequisite. Candidates must be at least 17 years of age, physically fit for teaching and possess the qualities necessary for service as a teacher. Training usually includes general and professional subjects and teaching practice. A pre-school teaching diploma course is available in three colleges of advanced education.</p>
2. Government primary and secondary schools			<p>Teacher education for Government primary and secondary teachers is conducted</p> <ul style="list-style-type: none"> (a) in teacher education units in colleges of advanced education; (b) within universities; (c) in separate institutions.
2.1 Teachers for primary schools, lower primary grades, infant schools or classes	Colleges of Advanced Education Universities	3-4	<p>As from 1974 all accredited government teachers colleges will become colleges of advanced education. The only separate institutions will then be private and/or denominational teachers colleges which have not sought and/or gained college of advanced education status.</p>
2.2 Art and crafts and homecrafts teachers in primary schools	Colleges of Advanced Education		<p>The State education departments offer training awards to intending teachers on the basis of academic merit and personal suitability. These awards provide a living allowance during the period of professional training at a government institution where tuition is free to award holders who in return are bonded to serve for a specified number of years in the government schools of the State where they are trained. One State also offers an unbonded but lesser allowance to student teachers.</p> <p>The entry requirements for teacher education institutions is success at the matriculation level examination (named according to the State) or an equivalent qualification. A pass in English is obligatory. Students receive general academic and professional training and must carry out periods of supervised practice-teaching in selected schools. In some States (New South Wales, South Australia, Western Australia and Tasmania) students who have completed their studies are not awarded their teacher's certificate until they have taught satisfactorily for a variable period of time which is inversely proportional to the length of their studies. These courses are designed for persons already holding a primary teachers certificate.</p>

AUSTRALIA

TEACHER'S TRAINING

Teachers	Place of Training	Length of Study (in years)	Other Information
2.3 General subjects in secondary schools	Colleges of Advanced Education	4 full time More part time	Intending secondary school teachers can either obtain a first university degree in the subjects they are to teach with additional professional training such as the Diploma of Education, or undertake a four-year course of secondary teacher education at a college of advanced education. In both cases they must hold the secondary school leaving certificate of the level required for university entrance. Teacher education involves periods of practice teaching in schools under the supervision of lecturers from the college or from the university. In some universities students can undertake professional training while continuing their studies for a first degree in education (Bachelor of Education). They may also be allowed to study for the Diploma of Education when they have only one more subject to pass before obtaining a first university degree. One university offers a four year full-time combined degree called Bachelor of Science (Education).
2.4 Physical education teaching in secondary schools	Colleges of Advanced Education Universities	2, 3 or more	A Diploma in Physical Education course of 2 or 3 years full-time study and 1 or more of part-time study is available in three universities and two colleges of advanced education. Two universities (Western Australia and Sydney) offer a 4 year full-time (longer part-time) Bachelor of Education with major study in physical education. At the university of Queensland physical education is available as a major or minor study in the Bachelor of Arts and Bachelor of Education courses, three year full-time, longer part-time.
2.5 Specialist teaching in secondary schools -	Colleges of Advanced Education Specialised Schools Universities Technical Colleges	Variable	Entrance requirements vary according to the colleges and specialised subjects concerned, but in general are based on results in the secondary leaving/matriculation examination. A pass in English is usually obligatory. Specialised subject courses and teacher education courses may be taken in separate institutions, or concurrently in a teacher education college and a specialised school such as a conservatorium of music, school of art, etc., at a university, or at a special institution (e.g. college for domestic science teachers).
2.6 Agricultural subjects	Agricultural College, University	3-5	Training for teachers of agricultural subjects in secondary schools consists of either an agriculture college diploma or a university degree course, together with professional teacher training.
2.7 Technical subjects in secondary schools	Colleges of Advanced Education Technical colleges University	2-4	Teachers of technical subjects in secondary schools may be trained in manual or industrial arts courses of two to four years duration at colleges of advanced education, technical colleges, or in one State, a university.
2.8 Teachers for handicapped children	Colleges of Advanced Education Technical colleges University	1-3	A one-year course is offered to candidates already holding a primary or secondary school teachers certificate. Three-year courses are open to students on completion of secondary schooling.

Teachers	Place of Training	Length of Study (in years)	Other Information
4. Technical Colleges	Variable	Variable	To preserve links with industry and trade practice, schemes have been developed for the recruitment of specialist tradesmen as teachers and for their training in educational method and teaching techniques. In Victoria, the Technical College provides training for students with appropriate diploma or trade qualifications and suitable industrial experience. In New South Wales technical college lecturers and tradesmen teachers receive an in-service course of teacher training in general education theory and training method, while correspondence courses and visiting lecturers assist the newly appointed tradesman-teacher in country colleges. Variations in this scheme are in operation in other States. Many technical teachers, principally of academic, commercial and domestic science subjects, hold teachers certificates from teacher education institutions.
5. Private primary and secondary schools	Private teachers Colleges of Advanced Education Universities		Private independent, and/or denominational schools are staffed in various ways: - with members of the religious order which controls the school - with teachers educated in private or denominational teachers colleges - with teachers who leave the government school system - with teachers with overseas qualifications - with university graduates.
6. Colleges of Advanced Education			A limited number of places are available in colleges of advanced education to private fee-paying students. However, as described in section 9 above from 1974 the Australian Government will be responsible for all non-fees bonded tertiary students who will receive means-tested living and incidental allowances.

6. Colleges of Advanced Education

00027

There is no formal teacher training for college of advanced education teachers. Appointment and promotion depend largely on experience, efficiency and academic attainments. Salaries are the same throughout Australia; salaries and conditions are safeguarded by the Federation of Staff Associations of Australian Colleges of Advanced Education. Many appointments are made from among junior university staff. To date little research has been conducted in colleges of advanced education, and is not a requirement for promotion. However, research in colleges of advanced education is encouraged.

Part-time tutor: Minimum requirement is a degree or recognised expertise in a specialised area. Appointment is temporary and on a pro-rata basis.

Assistant lecturer: A degree or equivalent recognised expertise (e.g. work experience or membership of a professional body) is necessary. Duties include lecturing, tutoring, administration, examination marking.

Teachers	Place of Training	Length of Study (in years)	Other Information
			<p><u>Lecturer:</u> Basic requirement is a degree or an honours degree. The duties are the same as for assistant lecturer.</p> <p><u>Senior lecturer:</u> Usually, but not necessarily, a post-graduate degree and recognised expertise. Duties include lecturing and administrative and shared academic responsibility for a department within the school.</p> <p><u>Principal lecturer:</u> A more senior level than senior lecturer. The duties include academic and administrative responsibility for specialised areas within each school.</p> <p><u>Fellow:</u> A position not yet common in all colleges of advanced education. Duties include academic head of a department or specialised area within a school.</p> <p><u>Head of school:</u> Duties are mainly administrative, but include some teaching.</p> <p><u>Graduate/Executive assistant:</u> A graduate appointed to assist the Head of School, the Registrars Division in college administration.</p> <p>As in colleges of advanced education, there is no formal training for university teachers, but some universities have introduced voluntary professional short courses for newly appointed staff. First appointment to the lecturer level and above are initially on a three-year basis. Promotion depends on experience, publications and academic excellence. There is also a strong move towards accepting teaching efficiency as qualification for promotion. Salaries are the same throughout Australia. Salaries and conditions are safeguarded by the Federation of Australian University Staff Association.</p> <p><u>Tutor, demonstrator:</u> Minimum requirement is an honours degree and duties include tutoring, laboratory demonstration and some administrative work. Tutorships are usually renewed annually for a period of three years, but longer appointments are common.</p> <p><u>Teaching fellow:</u> A post-graduate student in receipt of a salary from the university in return for tutorial duties. The appointment is usually limited to three years.</p> <p><u>Senior tutor:</u> Minimum requirement is as for tutor, but the appointment can be permanent. Duties include some lecturing, tutorials, examination setting, marking and administration. Some universities have introduced academic privileges such as sabbatical leave at this level.</p> <p><u>Principal tutor:</u> As for senior tutor.</p> <p><u>Lecturer:</u> Minimum requirement is a good honours degree, but it is common for appointees to hold a post-graduate degree. Duties are lecturing, tutoring, setting and marking examinations, administration, research.</p>

Teachers	Place of Training	Length of Study (in years)	Other Information
			<p><u>Senior lecturer:</u> It is usual for senior lecturers to have higher degrees and to have achieved high academic standards. There are administrative duties as well as academic duties as for lecturers, and supervision of post-graduate students.</p> <p><u>Associate professor, reader:</u> A more senior level than senior lecturer and usually in independent charge of a specialised field.</p> <p><u>Professor:</u> Holds a chair and is in charge of a department, school or faculty. The duties of this position are lecturing, administration, research and supervision.</p> <p><u>Senior research and research fellow:</u> A post-graduate degree or at least an honours degree (research fellow) is required, and some research experience. Appointments are for a particular team project led by the senior research fellow.</p> <p><u>Research assistant:</u> At least a graduate, to assist in research projects as directed. Appointments are renewed on an annual basis, or made for the duration of the project.</p> <p><u>Administrative assistant/officer:</u> A graduate appointed to assist Head of School/Faculty or Registrar's division in university administration.</p>

Compulsory schooling : usually 9 years, from 6 to 15.

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	D.E.C.O. Classification (8)
Type of Education (7)	Years of Study (8)					
1. Pre-primary education	2	To be at least 4 years old		Full time	This type of education is optional for children aged between 4 and 6 years and is provided in nursery schools.	Pre-primary
2. Primary education	6	To be 6 years old		Full time	This is a general basic type of education provided in primary schools for boys, girls or mixed schools. This cycle is compulsory, State-run, non fee-paying and common to all pupils. Private schools supervised by the State also provide the same type of education.	Primary
2.1. Premier cycle de l'enseignement primaire (1st cycle primary education)						
3. Special education	Variable	Admission on advice of a child guidance board and parental consent		Full time	This is provided within the primary framework and is designed for backward children of school age who, while they can benefit from instruction cannot complete the normal cycle of education.	Special Variable
4. General secondary education (short cycle)	3	Completion of 1st primary cycle	Primary leaving certificate	Full time	The aim of this cycle is the completion of pupils basic general knowledge and to equip them for their life as citizens assisting them in the choice of a career. It covers the final period of compulsory education and is provided in either boys or girls classes. Instruction includes workshop activities for boys and some domestic science for girls.	General Secondary (b)
4.1. Deuxième cycle de l'enseignement primaire, classes complémentaires (2nd cycle of primary education; complementary classes)						
4.2. Enseignement primaire supérieur (Further primary education)	2 or 3	Entrance examination		Full time	This level of instruction which formerly fulfilled the same aims as the complementary classes is no longer available. It was however designed for children who, having completed compulsory schooling, did not wish to pursue their studies.	General Secondary (b)

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)		O.E.C.D. Classification (8)
					Type of Education (7)	Years of Study (6)	
4.3 Enseignement moyen (Middle schools)					The course was run in separate schools for boys and girls, and was gradually replaced by middle schools following the implementation of the law of 16th August, 1965.	General secondary (b)	7 - 9
4.3.1 Cycle inférieur (lower cycle)	3	Successful completion of 1st primary cycle and entrance examination.	Special certificate (no examination)	Full time	This cycle provides general education common to all pupils,	General secondary (b)	10 - 11
4.3.2 Cycle supérieur (upper cycle)	2	Successful completion of lower cycle of middle school or secondary school or have passed the complete entrance examination.	Middle school certificate.	Full time	This upper cycle falls into 3 sections: commercial and administrative; technical and industrial; biology and social sciences.	General secondary (b)	10 - 11
5. General secondary education (long cycle)	4	Successful completion of 1st cycle primary education and entrance examination common to all establishments of secondary education, long cycle.	5th year entrance examination certificate.	Full time	Middle or intermediate type of education is provided in Intermediate Colleges, and in Intermediate and Vocational Colleges.	General secondary (a)	7 - 10
5.1 Education for boys prior to 1970 reform	3	5.1.1 Latin section - 1st cycle	Successful completion of 1st cycle primary education and entrance examination common to all establishments of secondary education, long cycle.	5th year entrance examination certificate.	Latin was a compulsory subject of study from the first year onwards in the classics section in the "lycées" and the "Athénée". As from the 3rd year pupils could choose between the greco-latin section including the study of Greek, or the latin section including the study of English. Admission to 4th year was conditional upon an examination held at the end of the 4th year for which a certificate is awarded. Pupils from the latin section could then opt either for subsection A with an emphasis on literature or for sub-section B with	General secondary (a)	11 - 13

5.1.2 Modern section					an emphasis on mathematics. At the end of their 5th year of studies, i.e. 2nd form, sub-section A pupils could choose to stay in sub-section A or to move into sub-section C which had a greater emphasis on natural sciences.	General secondary (b)	
- 1st cycle	3	Successful completion of 1st cycle primary education and entrance examination common to all establishments of secondary education, long cycle	4th year entrance examination certificate	Full time	This course was run in the same establishments as the classics course of the town of Luxembourg which had only the classics section. The study of English commenced in the 1st year. Admission to 4th year was conditional upon a pass in an entrance examination. As from this 4th year instruction was sub-divided into an industrial sub-section with a mathematics and science bias and a commercial sub-section with an economic, commercial and administration bias.	General secondary (b)	7 - 9
- 2nd cycle	3		2nd cycle secondary leaving certificate				10 - 12
5.2 Education for girls prior to 1970 Reform							
- 1st cycle	3	Successful completion of 1st cycle primary education and entrance examination common to all establishments of secondary education long cycle.	4th year entrance examination certificate.	Full time	The course was divided into a common 3-year 1st cycle and a 4-year 2nd cycle. Pupils going on to the 2nd cycle were required to sit an entrance examination at the end of the 1st cycle. As from the 4th year girls had a choice between the latin section and the modern languages section. The latter was sub-divided into a domestic science sub-section and a commercial sub-section. Both main sections had exactly the same curriculum with the difference that the latin of the latin section was replaced by commerce or domestic and social sciences and art.	General secondary (a)	7 - 9
- 2nd cycle	4		2nd cycle secondary leaving certificate				10 - 13
5.3 Education post 1970 reform							
5.3.1 Division inférieure, 1er cycle (Lower division, 1st cycle).				Full time	The structure and curriculum of this cycle of education is the same for boys and girls and it is provided in State-run 2nd cycle secondary schools (lycées) and private secondary schools.	General secondary (a)

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	D.E.C.D. Classification (8)
6. Technical and vocational education prior to the 1970 reform					The following types of education could be distinguished (a) technical education provided by the Craft and Trade School designed to train technicians for industry and crafts; (b) technical education provided either by the Technical School designed to train technicians in engineering or by the School of Agriculture and the Centre of Rural Domestic Science.	
6.1 Enseignement de l'Ecole des arts et métiers (Courses of Trade and Crafts School)					There were 3 sections. Pupils leaving school before completion of their studies were awarded an attendance certificate enabling them to complete their vocational training as indentured apprentices attending at the same time a vocational school thus obtaining a vocational proficiency certificate.	9 - 12
6.1.1 Division des métiers techniques (Technical trades division)	4	Entrance examination for 14 year-old pupils who have completed 2nd year of complementary classes.	Leaving certificate awarded after examination. It was equivalent to the vocational proficiency certificate awarded by vocational establishments.	Full time	This division included the following trade sections: building, mechanics, electrotechnics, and industrial machine tools.	Technical secondary (b)
6.1.2 Division des métiers d'art (Crafts division)	3	Entrance examination for 14 year-old pupils who have completed 2nd year of complementary classes.	Leaving certificate awarded after examination. It was equivalent to the vocational proficiency certificate awarded by vocational establishments.	Full time	The division included carpentry and cabinet making, wrought-iron work, ceramics, decorative painting and sculpture.	9 - 11
6.1.3 Division des beaux-arts et des arts décoratifs (Fine arts and decorative art division)	2	Entrance examination for 14 year-old pupils who have completed 2nd year of complementary classes.	Leaving certificate awarded after examination. It was equivalent to the vocational proficiency certificate awarded by vocational establishments.	Full time	Pupils in this division could follow an optional 3rd year advanced course, expanding their knowledge of ceramics, painting and sculpture.	9 - 10

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/ Part Time (5)	Other Information (6)	O.E.C.D. Classification (8)
6.2. Enseignement de l'école technique (Technical school education)	4	Entrance examination for holders of the Trade and Crafts School leaving certificate, or the vocational leaving certificate for the 4th year secondary education transition examination certificate.	Higher Technician	Full time	The school had 3 sections: mechanics, electrotechnics and civil engineering. The first year was a foundation year divided into 2 semesters. The 1st semester was spent on practical training with a firm. The 2nd semester was divided between General and technical instruction. Pupils could opt for the 3 sections mentioned above only after the completion of the foundation year.	Higher non-university 10 - 13 or 12 - 15
6.3. Enseignement agricole et viticole (Courses in agriculture and viticulture)	3	Entrance examination for 13 year-old pupils having completed the 1st year of complementary classes.	School leaving certificate.	Full time	The course was open to boys only, training them for rural work and for the occupation of gardener and forest ranger.	Technical secondary (b) 8 - 10
6.3.1. Ecole agricole (School of Agriculture)	3	Entrance examination for 13 year-old pupils having completed the 1st year of complementary classes.	School leaving certificate.	Full time	The course was open to girls only, training them for various jobs within a rural environment.	Technical secondary (b) 8 - 10
6.3.2. Centre de formation ménagère rurale (Rural domestic science training centre)	3	Entrance examination for 13 year-old pupils having completed the 1st year of complementary classes.	School leaving certificate.	Part time		Technical secondary (b) 8 - 10
6.3.3. Ecole viticole (School of Viticulture)	3	Entrance examination for 13 year-old pupils having completed the 1st year of complementary classes.	School leaving certificate.	Full time	Vocational proficiency certificate.	Technical secondary (b) 9 - 11
6.4. Ecoles de commerce (Schools of commerce)	3	No be 14 years old and have completed 2nd year of complementary classes and passed an entrance examination.			Instruction was both general (5 languages, courses in citizenship, hygiene etc.) and specialised for commercial topics. During the 1st 2 years instruction was run on a full-time basis and the 2nd year offered the possibility of specialising either in business management or office work. The 3rd year was spent entirely in an indentured apprenticeship.	

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	O.E.C.D. Classification (7)	Years of Study (8)
6.5 Ecole hôtelière (Hotel school)	3	Entrance examination for 14 year-old pupils who have completed the 2nd year of complementary classes.	Vocational proficiency certificate	Full time	Catering staff had to undergo a full-time training. Instruction was divided into 3 parts: a general one (4 languages; French, German, English, Dutch), a theoretical vocational one and a practical vocational one. The course was completed in the summer months with practical training in hotels.	Technical secondary (b)	9 - 11
7. <u>Technical and vocational education post 1970 Reform</u>				Full time	<p>There are 3 types of technical and vocational education:</p> <ol style="list-style-type: none"> 1. technical type - full time: education to level of qualification desired. 2. vocational type: mixed training, commencing with basic school education followed by an indentured apprenticeship combined with school courses. 3. practical type: an indentured apprenticeship on completion of compulsory education with courses in applied vocational science. <p>The full time technical section includes a variety of training possibilities: technical trades, art and fine art, commerce, chemistry, para-medical education, courses for boarding school staff, youth club staff, agriculture and vine-growing, rural domestic economy and hotel trade courses.</p> <p>The aim of the course is to provide pupils with a more advanced and more systematic theoretical and practical training than that offered under an indentured apprenticeship plus school courses. Moreover, it allows young people to train for careers for which the indenture scheme proves difficult or impossible.</p> <p>Before embarking on this course pupils must have successfully completed both classes of the foundation and guidance years of technical and vocational</p>		

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	O.E.C.D. Classification (7)	Years of Study (8)
7.1.1 Technical trades.	2	Entrance examination to common 7th year for pupils who have completed 6th primary year successfully; admission to 8th (technical) form for secondary or intermediate (middle school) pupils; entrance examination to 8th technical form for pupils who have completed 7th primary form.	Leaving certificate	Full time	The period of training lasts 3 years. At the end of the course pupils are awarded the school certificate, considered equivalent to the certificate of vocational proficiency (CAP) inasmuch as they can go on and prepare a "maîtrise" (advanced certificate). They can continue their studies to become technicians or higher-technicians.	Technical secondary (b)	7 - 8
- Cycle d'orientation et d'observation (Foundation and Guidance cycle)	3	Formation professionnelle (Vocational training; lower cycle)	Technician's certificate	Full time	Technical trades include construction, mechanics, electrotechnics and industrial machine tool. As from academic year 1970/71 the electrotechnics section has included a 2-year cycle of complementary studies on an experimental basis. Its aim is to train technicians.	Technical secondary (b)	9 - 11
- Cycle supérieur (Upper cycle)	2	Trade and crafts certificate, CAP Vocational proficiency certificate.	Technician's certificate	Full time	Only the Trades and Crafts School of Luxembourg runs courses of this type. The crafts section includes decorative iron work, ceramics, decorative	Technical secondary (b)	12 - 13
7.1.2 Arts and Crafts

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	O E C D Classification (7)
- Cycle d'observation et d'orientation (Foundation and Guidance cycle)	2	See 7.1.1		Full time	painting and sculpture. The evolution of techniques in the sphere of crafts has and will bring about radical changes in certain sections of this group of crafts. For instance starting in the school year 1970/71 the carpentry and cabinet making sections had to be made into one comprehensive section including both woodwork and use of synthetic materials and the traditional carpentry course will be open in the future only to apprentices under contract.	7 - 8
- Formation professionnelle (Vocational training) - "lower" cycle	3		Leaving certificate	Full time	This type of course is solely provided in the Crafts and Trades school. Courses in modelling, painting and sculpture are offered. The Leaving certificate is in some cases considered equivalent to the CAP, decoration section and allows candidates to continue their artistic training abroad.	9 - 11
7.1.3 Fine arts and decorative art courses					Holders of the leaving certificate can continue their studies for a further year of specialisation thus obtaining the higher proficiency certificate in artistic training (CAFAS)	
- Cycle d'observation et d'orientation (Foundation and Guidance cycle)	2	See 7.1.1		Full time		7 - 8
- Formation professionnelle (Vocational training) - Lower cycle	3		Leaving certificate	Full time		9 - 11
- Upper cycle	1	Leaving certificate of the fine-arts section				12
7.1.4 Commercial courses					Commercial courses provided within technical type education are offered in commercial sections of various technical and vocational establishments	Technical secondary (b)

00040

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	O.E.C.D. Classification (7)	Years of Study (8)
- Cycle d'observation et d'orientation (Foundation and guidance cycle)	2	Entrance examination to common 7th form; 8th and 9th economics section for pupils who have completed 6th, 7th or 8th year of primary (complementary) (complementary)		Full-time	The period of specialised training lasts 3 years, comprising 2 years of theoretical study followed by a 1-year practical training period. At the beginning of the 2nd year pupils can choose either the "business management" or "office work" section. On completion of the 2nd year pupils sit their apprenticeship examination - theoretical part, in their chosen options, whereupon they are awarded a partial CAP (theoretical part).		7 - 8
Formation professionnelle (Vocational training)	2 + 1 year training course	No entrance examination to 8th or 9th form in economics for pupils who have successfully completed 1st or 2nd year of secondary or intermediate cycle.	CAP (Vocational proficiency certificate).	Full time	The complete CAP is awarded to pupils who pass the practical examination at the end of their year's practical training. Holders of the CAP theoretical part are admitted without examination to the 4th year of the intermediate cycle or to 5th year after sitting the entrance examination.		9 - 11
- Cycle inférieur (Lower cycle)					This type of education is at present under review.		
7.1.5 Chemistry courses					As from 1974/75 a preparatory class will be run by the School of Commerce and Management for CAP holders-theoretical part.		
- Cycle d'observation et d'orientation (Foundation and guidance cycle)	2	Entrance examination to common 7th form, 8th form in biology for pupils who have completed 6th or 7th year of primary and complementary studies.		Full time	The chemistry course comprises a lower 3-year cycle leading to assistant-chemist level and a 2-year upper cycle leading to a career as a chemist technician.	7 - 8	Technical secondary (b)
- Cycle inférieur (Lower cycle)	3	Admission to 8th or 9th form for pupils who have successfully completed the first certificate.			There are chemistry sections in the vocational school of Esch/Alzette and in the Luxembourg Vocational Centre. The latter is however the sole body to provide training as chemist technician.	9 - 11	
- Cycle supérieur (Upper cycle)	2	2 years of secondary or intermediate cycle.	Assistant chemists Chemist technician's diploma.	Full time Full time	Holders of an assistant chemist's certificate are admitted freely to the upper cycle.	12 - 13

					Type of Education (7)	Technical secondary (b)		
7.1.6 Paramedical training					There are two cycles, the first or preparatory cycle lasting 3 years. Training at this stage is of school type. Courses are provided in certain State-run vocational schools or in nursing schools affiliated to private hospitals. In order to establish some contact with the professional milieu the curricula includes regular visits to the hospitals or similar institutions. On completion of 1st preparatory cycle pupils take an examination before going on to upper cycle.			
A - Formation des infirmières (Nurses training)				Full time				7 - 8
- Cycle d'observation et d'orientation (Guidance and foundation course)	2	See 7.1.5						
- Cycle inférieur préparatoire (Lower preparatory cycle)	3		Pass certificate to upper cycle	Full time				9 - 11
- Cycle supérieur (Upper cycle)	3*	Pass certificate awarded to pupils who have completed the lower preparatory cycle. Intermediate leaving certificate biology and social sciences section.	Registered nurse	Full time	The upper cycle lasts three years, providing both theoretical and practical aspects of vocational training proper. Courses of this cycle are run by either State-run or private nursing schools. The nursing diploma is awarded at the end of the course. Holders of the diploma can specialise by completing 1 or 2 years of further training.			12 - 14
B - Formation des aides-sagefemmes (Training of auxiliaries in nursing)	1	To be 17 years old and have successfully completed 9th year of studies	Auxiliary certificate	Full time	A government proposal stipulates that as from 1974-75 pupils who have completed either the preparatory cycle or 5 years secondary or intermediate studies in the biology and social science section will be admitted to this cycle automatically. Moreover all candidates aged 17 who have completed 11 years of studies will be admitted after an examination.			10
7.1.7 L'enseignement pour moniteurs (Courses for boarding school monitors)					Theoretical and practical training is provided in clinics and hospitals.	Technical secondary (b)		
					The structure of courses in similar to nurses' training:			
					- a 3-year 1st or preparatory cycle	Technical secondary (b)		

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	D.E.C.O. Classification (7)	Years of Study (8)
- Cycle d'observation et d'orientation (Guidance and foundation cycle)	2	See 7.1.5	Examination for entrance to upper cycle.	Full time	- a 2-year upper cycle providing training proper. In 1st year of preparatory cycle the curricula are the same for both trainee-monitors and trainee nurses, but in subsequent years there are substantial differences in courses. This course provides training for auxiliary staff, qualified in the surveillance and guidance of pupils in their extra-curricular activities as well as adolescents in boarding schools, in reform schools, in centres for handicapped children and youth clubs.		7 - 8
- Cycle inférieur (Lower cycle)	3				Holders of the intermediate leaving certificate or of the pass certificate to the upper cycle of paramedical studies (training of nurses) can enter the upper cycle which is divided into periods of practical training run together with courses. At present the Vocational Teaching Centre of Luxembourg is the only body which provides this type of training.	Technical secondary (b)	9 - 11 --
- Cycle supérieur (Upper cycle)	2	Examination for pupils who have completed preparatory cycle. Intermediate leaving certificate	Monitor's certificate	Full time	Training is provided in two State-run schools; one for boys - Agricultural School of Ettelbruck, and one for girls - the Rural Domestic Economy training centre of Mersch. At present the Vocational Teaching Centre of Luxembourg is the only body which provides this type of training.	Technical secondary (b)	12 - 13
7.1.8 Courses in agriculture and vine-growing.					Agricultural courses for boys include 2 levels of studies as well as special courses of retraining and further training for adults.		
A - Institut d'enseignement agricole (Institute of Agriculture) - 1er degré (1st level)					The 1st level trains farm managers and 2nd degree agricultural technicians. There are 2 cycles in the 1st level. The 1st cycle lasts 3 years comprising technical and general studies. Pupils who complete this cycle successfully are awarded a pass certificate leading to the 2nd cycle, and those who have been unsuccessful are awarded a practical qualifying certificate.		7 - 9
- 1er cycle (1st cycle)	3	Entrance examination to common 7th form for pupils cycle or practical who have completed qualifying 6th form in primary certificate school	Pass certificate	Full time

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	D E C D Classification (7)	Years of Study (8)
- 2ème cycle (2nd cycle)	2	Pass certificate awarded to pupils who have completed the 1st cycle.	Certificate in agriculture.	Full time	The 2nd cycle lasts 2 years including various options: agriculture and stock breeding; rural economy and foodstuff; vine-growing; horticulture and forestry. A certificate in agriculture showing option(s) studied is awarded at the end of the course. Complementary classes in agriculture are run throughout the 3 years of the 1st cycle for students who have failed the entrance examination. A practical qualifying certificate is awarded at the end of this course.	12 - 13	
- 2ème degré (2nd level)	2 semesters + training periods	Completion of 1st degree.	Agricultural technicians diploma.	Full time	2nd level course lasts 2 winter semesters; it is completed with practical periods of training and the agricultural technician certificate is awarded at the end of the course.	12 - 13	
B - Formation ménagère rurale (training in rural domestic economy)	3 or 4	Same condition as for 1st level of school of agriculture.	Certificate in rural domestic economy.	Full time	The Rural Domestic Economy Training Centre includes a 3-year section dealing with household subjects (complementary type) and a social and rural economy section lasting 4 years and providing both practical and theoretical training.	7 - 9 or 13 7 - 10	
7.1.9 Hotel school.	4 or 5	Entrance examination to 1st year completed 7th form of primary school. No examination to 1st year required for pupils who have completed 1 year of intermediate technical or secondary education.	Leaving certificate and CAP (vocational certificate).	Full time	Hotel School of Diskirch trains staff qualified for employment in hotel and tourist industry.	9 - 12	
		Entrance examination to 2nd year for pupils who have completed 8th year primary studies and who have followed 2			Pupils are recruited at age of 13 and 14 on completion of 1 or 2 years of post-primary studies either in a technical school (full time) or secondary or intermediate school. An entrance examination is held for other pupils.		
					Hotel training courses last 4 or 5 years and covers 8th, 9th, 10th, 11th and 12th forms. The last 3 forms are each followed by a 10-week period of practical training in a Luxembourg hotel.

					Type of Education (7)	Years of Study (6)
7.2 Vocational type training	Years of intermediate or secondary technical education.				The CAP is awarded at the end of the course and a leaving certificate in hotel training which is a higher qualification than the CAP.	Training is provided for craftwork, commerce and industry. There are 2 levels in the training for crafts: - CAP and the "maîtrese" (masters) certificate are provided in the crafts section, whereas vocational training in commerce and industry terminate with the award of the CAP. Academic training is provided in vocational institutions while practical training is in the main carried out within a firm independent of the school itself. As the period of compulsory education ends at age of 15 (9 years of study) the apprenticeship can begin only in the 10th year of studies. The periods before and after this age limit have to be considered separately.

✓

00045

Training is of a purely academic nature up to the age of 15. In theory pupils can choose any one of the courses available, and can enter an indentured apprenticeship as soon as the age requirement is reached. The most straightforward way of completing the course is through 6th primary form, 7th common course, the 8th vocational form and the 9th vocational (comprehensive). The 2nd cycle of primary education (complementary classes) will be brought into line with the 3 classes of the vocational cycle with regard to the content of the curriculum.

As for the crafts apprenticeship scheme the 9th vocational form is considered an introductory year to the practical applications of the craft. Pupils who successfully complete this class can benefit from a reduction of 6 months to 1 year on their apprenticeship.

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	OECO Classification	
						Type of Education (7)	Years of Study (8)
7.2.1 Crafts apprenticeship	3	Entrance examination to common 7th form, 8th or 9th vocational form for pupils who have completed 6th, 7th or 8th primary year.	CAP vocational certificate	Full time	The craftsman's apprenticeship can be carried out in 6 groups of trades: metal work, hairdressing, clothing, building, food and graphic arts.	7 - 9	
- Schooling	2 - 2½	No entrance examination required for pupils who have successfully completed 2 years of intermediate or secondary education.	Part time	Pupils coming through the regular course attend the common 7th form, the 8th guidance year, and the 9th comprehensive form on a full time basis.	The indentured apprenticeship period follows: with classes of 10th and 11th form. If the pupil is learning a trade related either to clothing industry, to food processing or construction, or 10th, 11th or 12th form if pupil undertakes one of the other crafts. The apprenticeship varies from 3 to 3½ years depending on the trade but is shortened if the pupil has come through the regular course (7th common form, 8th and 9th vocational form). The CAP is awarded on the basis of marks scored in the final apprenticeship examination.	10 - 11 or 11½	
- Apprenticeship proper	2 - 2½				Pupils from 1st group are required to complete 6 additional months of their apprenticeship in the workshop after 11th form, before being allowed to sit the practical part of the final apprenticeship examination.		
					In the above-mentioned classes pupils attend an average of 7 periods per week. These periods are solely devoted to theoretical aspects of vocational training.		
					Transition from one class to the next is based on results obtained. The final apprenticeship examination includes only practical aspects of vocational subjects and the theoret-

Other courses 3 - 32	To be 15 years old				local subjects of their last apprenticeship year. Should the pupil fail 9th form he can nevertheless enter an indentured apprenticeship. He will then be able to catch up in the 9th form of adaptation during which the vocational subjects included in the full time 9th comprehensive vocational form are studied 6 hours a week. If necessary pupils can attend courses in other subjects but this is optional. For the rest of the apprenticeship period the pupil completes the regular course of studies but is one year behind. Failure in the 10th form onwards entails a longer apprenticeship and repetition of this year. Pupils with two successive failures in the same class will be restreamed into the practical section.	10 - 12/ ¹	
				Part time	Pupils who do not attend the regular course can take an examination based on the subjects taught in the comprehensive 9th form once they are 15. If they succeed they benefit from the advantages reserved for pupils completing the regular course. In all other cases apprenticeship pupils have to undergo the 9th form of adaptation and are consequently one year behind in their studies. Training for electrical trades is as follows: (1) apprentices in telecommunications (radio, television etc) are required to attend a specific 2-year full time vocational course after the 9th comprehensive vocational form, before becoming indentured apprentices. The period of apprenticeship is then reduced to 1 year. (2) the other apprentices electricians are recommended to attend a 10th full-time form after the 9th comprehensive vocational form, before becoming indentured apprentices. In this case the period of apprenticeship is

9. Teacher training	Institut pédagogique (Institute of pedagogics)	Admission depending on placing in certain subjects of secondary leaving certificate examination	Teacher's certificate	Full time (courses & training periods)	The Institute of pedagogics has replaced the teacher-training college since 1960. Pre-primary, primary, complementary, intermediate and vocational teachers are trained here.	Higher non-university 14 - 15
10. University education	10.1 Département de droit et des sciences économiques (Department of Law and Economic Science)	To hold secondary leaving certificate	Certificate in commercial law studies awarded after examination	Full time. Only the 1st year of university studies is provided in the "university level courses" of the Luxembourg university centre	The course constitutes the 1st year of a university law course.	Higher university
	10.2 Département des lettres et des sciences humaines (Department of arts and humanities)		Certificate in literary studies and human sciences awarded after examination		The course constitutes 1st year of a university arts course.	
	10.3 Département des sciences (Department of sciences)		Certificate in science awarded after examination		The course constitutes 1st year of a university science, medicine, veterinary medicine and pharmacy course.	

Teachers	Place of Training	Length of Study (in years)	Other Information
1. Pre-primary education	Institute of pedagogics	2	Candidates are required to hold the secondary leaving certificate. Training lasts 2 years and the content of the syllabus is determined by the Government.
2. Primary education (first cycle)	Institute of pedagogics	2	Primary teachers are trained in the Institute of pedagogics. Admission to the course depends on results obtained in secondary leaving certificate examination, and number of entrants is determined annually by ministerial decree. There are both theoretical and practical courses. During the two-year training period students are considered as probationary teachers and are paid. The teaching proficiency certificate is awarded at the end of the training period, entitling the holder to teach in the first 6 years of primary classes.
3. Complementary education (primary and cycle)	Institute of pedagogics	2	By sitting special examinations candidates can obtain a certificate in either complementary education, special or intermediate education. Holders of the latter certificate may be transferred to the intermediate cycle.
4. Intermediate & 1st cycle secondary	Institute of pedagogics	2	There are also several other special certificates available in the primary cycle especially with regard to the direction of girls. The hand-work teacher's certificate constitutes a single examination taken by girls aged 18.
5. General secondary education	University	4 + 3 academic terms	Entrance requirements are same as those for primary teachers. Holders of the teaching proficiency certificate must wait a minimum of 2 years before taking the upper primary complementary certificate examinations. This examination syllabus is determined by ministerial decree.
6. Secondary	University	4	There are at present 2 types of 1st cycle (intermediate) teachers.
			1. Intermediate teachers who are holders of the proficiency certificate in complementary education.
			2. Holders of the complementary certificate who with ministerial permission have completed 4 university semesters abroad and who have been nominated 1st cycle or intermediate probationary teachers after passing the entrance examination to the 2 year pedagogics training course. A pass in the final practical examinations leads to their appointment as intermediate or 1st cycle teachers.
			3. A secondary teacher can also be transferred or appointed to the intermediate cycle. (see 5: secondary education)
			4. All candidates are required to hold the secondary leaving certificate and be enrolled in a university course before they are admitted to the teacher training course.
			5. Intending teachers in arts and science subjects complete 4 years of university studies which com under:
			a) Law of 5th August, 1929 which stipulates that State examinations should be sat in Luxembourg before a board of judges for national award.

Teachers	Place of Training	Length of Study (in years)	Other Information
			<p>b) Law of 18th June, 1959 according to which grades and titles are awarded by the university where the student has studied.</p> <p>2. Intending specialised teachers (economic science, physical education, drawing, music) at present complete a minimum of 3 years higher education in a specialised foreign university level institute. The final diploma is awarded by the establishment where the student has studied.</p> <p>The teacher training course lasts for 8 academic terms and includes :</p> <ul style="list-style-type: none"> a) the general teacher training course ; b) presentation of a scientific research project ; c) period of practical training. <p>a) The general teacher training course takes place within the university centre and lasts for one academic year. It comprises common courses on the pedagogical, psychological and sociological problems in teaching, common courses of general teaching methodology as well as specialised courses on didactics and the subject matter of various aspects of teaching. An examination is held at the end of this 1-year training course.</p> <p>b) Scientific research, the subject of which is chosen according to the specialised subject of the trainee-teacher is carried out with the aid of a research supervisor either abroad or in Luxembourg. A 3-member committee is convened for the assessment of each memoir.</p> <p>c) The practical training course open to candidates who have passed the examination mentioned above in a., lasts for 5 academic terms. The trainee, sent out to one of the country's secondary schools may be responsible for a limited teaching load as is the case with the general teacher training course. The general-teacher training course is organised by the director in conjunction with 2 advisors in pedagogics. This part of the course includes a series of practical lessons, the marking of pupils homework and the presentation of a dissertation in pedagogics. During the 5th term of the practical training course each candidate undergoes a practical examination individually before a 5-member committee. This examination includes : 2 inspections in classes where the student usually teaches ; 2 demonstration lessons in the student specialist subject ; correction of 2 lots of pupil homework.</p>

00052

The trainee-teachers who have successfully passed all the tests mentioned in a, b, c, can be appointed immediately to a teaching post.

LUXEMBOURG

TEACHER'S TRAINING

53

Teachers	Place of Training	Length of Study (in years)	Other Information
6. Technical and vocational education			
6.1 General subjects	University	4	According to the law of 27th September, 1961 which determines the terms of employment for technical and vocational establishments, technical education can be staffed by "professeurs-docteurs", teachers of physical education and technical drawing teachers trained as secondary teachers (see above.)
6.2 Commercial subjects	University	4	In commercial subjects within the technical cycle, staff is composed of either economic and social science teachers who have undergone secondary teacher training and have been transferred to the technical cycle once they are fully qualified or teachers of economics who hold a university degree awarded on completion of a 3-year course followed by a 1-year training course with a private or State-run firm. Teacher training is the same as for economic and social science teachers.
6.3 Technical subjects	University - Teachers	4 - 5	Theoretical technical training is open to engineers or architects with a university degree. In order to obtain a teaching qualification candidates must complete a 2 year teachers training course which can be reduced to 2 or 1 year depending on the candidates previous vocational experience.
			A great part of general and theoretical technical instruction is provided by teachers of technical and vocational subjects.
			3 categories of teachers corresponding to the following specialist subjects may be distinguished.
			(a) general course (arts, mathematical and physical science, chemistry and biology) (b) technical drawing (c) technical science (mechanics and electrotechnics)
			To secure admission to the technical and vocational training course candidates are required:-
			(a) to hold a Luxembourg secondary leaving certificate or foreign equivalent recognised by current Luxembourg law. University. OR Institute of pedagogics and University
		3 2+2	(b) to have completed six university semesters or the Institute of Pedagogics course and have at least 5 years professional experience as a primary teacher; hold a 1st cycle (intermediate) teachers' certificate or equivalent and have successfully completed 4 university semesters in one of the above mentioned specialist subjects. (c) have passed the annual control examinations of the course either in Luxembourg before an examination board set up by the Minister of Education or in a university of the students own choice, provided

Teachers	Place of Training	Length of Study (in years)	Other Information
			that the examination sat is the regular final examination of the country in question and is recognised by the Luxembourg examination board.
			Candidates who hold a foreign degree awarded on completion of at least 6 university semesters or have completed a special higher studies "oursenal" and vocational teacher or to a post as teachers training course subjects are exempted from the examinations.
			The teachers training course which lasts 3 years can be reduced to 2 or 1 if a candidate can give evidence of professional experience required after completion of the examinations required for admission to the training course.
			A final examination is held at the end of the teachers training course which determines entry to teaching profession.
- Primary technical and vocational teachers	Institute of Pedagogics	2	Primary technical and vocational teachers are required to have attended the Institute of Pedagogics and hold the intermediate school teachers' certificate or equivalent. Admission to the vocational and technical education training course takes place after 6 years primary teaching. The minimum duration of the training course is 1 year at end of which an examination is held.
- Instructors	Institute of Crafts	6 after CAP (vocational professional proficiency certificate)	Candidates wishing to become instructors are required to hold an advanced certificate in their specialist subject ("maîtrise"). They must then be presented for the training course entrance examination made up of a theoretical (general and vocational theory) and practical part. The training course lasts 3 years, as is the case for other teaching staff of technical sector and can be reduced up to 2 years depending on the candidates vocational experience.
7. Agriculture		3/4/5	Certificated teachers in engineering (engineers in agronomy), technical and vocational teachers, teachers of physical education, primary technical and vocational teachers as well as instructors whose scientific and pedagogical training is equivalent to those required for the same teaching categories in other sectors of technical education, are recruited to schools of agriculture.
8. Higher technical Education	University Technical School	4 or 5 years + 2 year teacher training period	There are 3 categories of teachers in the higher technical cycle: 1. Secondary teachers transferred or appointed to posts in higher technical education (see 5, secondary education). 2. Certificated teachers in engineering. 3. Technical and transferred teachers.
9. School of management and commerce	University	4 years + 2 year teacher training period	All teachers have been transferred from secondary schools or appointed to posts in school of management and commerce.

SWITZERLAND

(July 1972)

Period of compulsory schooling varies from canton to canton, from 6th or 7th birthday to 14th, 15th or 16th. Compulsory schooling ends in 7th, 8th or 9th year of studies.

In cantons where compulsory schooling is less than 9 years,
an optional 8th or 9th year of studies is often available.

5.2. Realschule - Obwalden, Appenzell (Inner-Rhômes) - Basel-Town	3 6	Completion of: 6th year of primary studies. 4th in Basel-Town and 5th in Basel-District and Luzern.		Full time	These schools, which are of same level as "Sekundarschule", generally lead to vocational schools and commercial schools. In Basel-Town, girls can go on to the "Mädchenoberrealschule" after 2 years of study. Here they can prepare certificates over 4 years, one of which leads to certain higher schools.	General Secondary (b).	7 - 9	
- Basel-District	4 - 5	Generally entrance examination required			In the canton of Luzern, the Realschule corresponds to type C courses of the "Mittelschulen".			
- Luzern	4				After 2 years of study may lead to 1st year of the "Kantonsschule" (gymnasium) or after 4 years to 2nd year of same. Generally leads to vocational training.	General Secondary (a) OR (b)	6 - 9/10	
5.3. Stadtrealschule - Schaffhausen	4 - 5	Completion of 5th year of primary studies. Entrance examination		Full time	Leads to schools of agriculture.	General secondary (b)	7 - 9	
5.4. Landrealschule - Schaffhausen	5	Completion of 1st year of "Oberklassensee", Entrance examination		Full time	Contrary to what the school's name suggests, the "Unterrealschule" does not lead to the "Realschule" but to part-time vocational schools of the canton of Uri. This type of educational establishment is known as such only in the canton of Uri.	"	7 - 9	
5.5. Unterrealschule - Uri	3	Completion of primary school (6 years). Entrance examination		Full time	This school and the courses are part of the institute for girls and may lead to the commercial section of the institute.	"	7 - 9	
5.6. Mädchenreal-Schule et Realvorkurs - Nidwalden	3	Completion of 6th year of primary school. Entrance examination		Full time	Leads to vocational training.	"	8 - 9	
5.7. Handwerkerschule - Glarus	2	Completion of 7th year of primary school. Entrance examination		Full time	Leads to commercial schools and teacher training colleges.	"	7 - 9/10	
5.8. Bezirksschule - Solothurn	3 - 4	Completion of primary school. Entrance examination		Full time

5.9. Ecoles secondaires inférieures (1st cycle secondary schools) - Fribourg	Completion of 6th year primary school 3 - 4			Full time	This includes arts technical and commercial sections. The agriculturally-biased regional schools belong to this category. The arts section curriculum is similar to that of the 1st cycle of the "Gymnasium", the other sections lead either after 2 years, to teacher training colleges and higher commercial schools, or after 3 years to vocational training - full or part-time.	General secondary (a) or (b) 7 - 9/10		
5.10. Classes supérieures (Upper classes) - Vaud	Completion of 5 or 6 years primary schooling 3 - 4		Leaving certificate	Full time	These classes are intended for pupils not attending "secondary colleges" but secondary who show enough ability to benefit from a secondary course. For particularly gifted pupils these classes may lead to a transition class in the mathematics and science section of the "gymnasium" and direct entry of the 2nd year of the higher school of commerce.	General secondary (b) 6 - 9 or 7 - 9		
5.11. Collèges secondaires (Secondary Colleges) - Vaud	Completion of 3rd year of primary school. Entrance examination		Secondary leaving certificate	Full time	On completion of 3rd year of primary school pupils in the canton of Vaud can enrol in a 2-year foundation course after which they are streamed according to their intellectual ability and vocational preferences into the various sections of these colleges. These sections lead either to vocational or commercial courses or to a general course leading to a general studies certificate. (For other sections see 6.3.)	4 - 5 6 - 9		
5.12. Enseignement secondaire du 1er degré - section générale (1st cycle secondary education - general section) - Valais	Completion of 6th year primary school Entrance examination 4	- Cycle d'orientation (Foundation course) - Section langues modernes et sections générales (Modern languages and general sections)	2	Full time	1st cycle secondary education comprises 2 sections: General studies section leads especially to vocational and commercial courses. (For other section see 6.4.)	3	7 - 9

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	O.E.C.D. Classification (8)
5.13. Enseignement secondaire inférieur - classes modernes (1st cycle secondary education, modern section) - Neuchâtel	Completion of primary school (5 years)			Full time	The 1st year of studies, known as the "first modern vocational year" is common to the modern and vocational section (See 4.13.) Instruction provided in these classes leads to vocational and commercial courses. (See also 6.5.) The 2-year pre-reform type classes or transition classes in operation before the present reform in the canton may also be included in this category.	General secondary (b)
5.14. Cycle d'orientation (General foundation course) - Geneva	Completion of 6 years of primary school			Full time	This section of the foundation course leads in particular to vocational and commercial courses (see 4.8. and 6.6. for other sections)	7 - 9
5.15. "Collège moderne" - Geneva	Completion of 7 years of primary school			Full time	Instruction is of general nature and is intended for boys providing preparation for vocational and commercial courses.	8 - 9
5.16. Scuola maggiore - Ticino	Completion of 5 years of scuola elementare			Full time	After 3 years of study the scuola maggiore may lead either to the "scuola di economia domestica" or to the higher school of commerce (scuola di commercio), or to the ginnasio (to 8th year without an entrance examination or to 9th year with an entrance examination), or to the "scuola d'avviamento professionale" which provides a preparatory year for commercial and vocational schools, or to teacher training college preparatory school.	6 - 8
0 0 0 65						Most cantons provide this type of education in long courses general secondary establishments i.e. "gymnasium" as described in section 8. There are however several specific establishments - see list below.
<u>6.1st Cycle General Secondary Education - Latin and science classes</u>

12. Vocational Education					If in the fields of primary and secondary studies the cantons have entirely independent legislation - hence the diversity and complexity of the Swiss educational system - in the field of vocational education the situation is different. According to certain articles of the federal constitutions the government has legislative power in the field of vocational training in industry, trades and crafts, commerce, agriculture and domestic science. This explains why, despite the variety of names used, there is a certain uniformity in entrance requirements, length and level of studies and the quality of diplomas or certificates awarded. Moreover, these vocational schools are often supranational establishments run by professional bodies e.g. hotel schools, cheese-making schools, schools of embroidery, schools for "droguistes" and the Schweizerische Textillfachschule (Zürich) which is a specialised vocational school catering for pupils from all over the country, etc. In most cases curricula and examinations are subject to federal law.				

Type of Education or Institution (1)	Length of Study (in years) (2)	Entrance Requirements (3)	Certificate (4)	Full/Part Time (5)	Other Information (6)	O.E.C.D. Classification (7)	Type of Education (8)	Years of Study (9)
12.1. Vocational training for commerce, trade and industry								
12.1.1. Lehrwerkstatt.	Bern, Zurich	3-4	Completion of: 9th year of studies and in some cases entrance examination	Federal proficiency certificate (end of apprenticeship)	Full time	These are workshop-schools providing a complete training both practical and theoretical, for apprentices trained exclusively in the school.	Technical secondary (b)	10-12/13
12.1.2. Ecoles ateliers	Fribourg	3-4	Completion of: 9th year of school and in some cases entrance examination	Federal proficiency certificate (end of apprenticeship)	Full time	In the canton of Graubünden pupils may, after one full-time 'year' of studies, go on with their school training on a part-time basis. Equivalent to schools mentioned above (see 12.1.1.)	"	10-12/13
12.1.3. Verkersschulen	St.Gallen, Luzern, Solothurn	2	Completion of compulsory schooling with at least 3 years in a secondary school and intend to enter public services	Certificate	Full time	These schools of commerce and administration are located in a few of the main cantons and prepare young people for their apprenticeships which they start at the age of 17 with the C.F.F. (national railways), P.T.T. (Post and Telecommunications), Customs services, with Swissair and Swiss radio. In other cantons there are "Berufsschulen für Verkehr" preparing young people for the same apprenticeships as above or giving them complete training for these posts. Matriculation fee.	"	10-11
12.1.4. Etablissements professionnels	Vaud, Neuchâtel	Variable depending on specific compulsory schooling. Several subject schools have entrance examination	Diplomas or certificates of various schools	Full time	In the cantons of Vaud and Neuchâtel this term refers to the group of schools composed of: trades school of the town of Lausanne (7 sections: mechanics, electricity, radio-electricity, woodwork, automobile engineering, machine tools, smithy and welding). Trade and craft school of Vevey (3 sections: window dressers and decorators, photography, ceramics). The trades school of Yverdon specialises in mechanics and electricity.	"	Variable

		can prove they have reached vocational grade equivalent to the federal proficiency certificate, acquired in a trades school or industry can sit the entrance examination			the Technikum which serves many cantons of central Switzerland hence the name "Das Zentralschweizerische Technikum Luzern". Very often the "Technikum" are divided into technical sections which award a certificate of technician in engineering (H.T.L.) and in trades school awarding proficiency certificates. The various sections and trades schools of the Technikum often reflect the economic needs of the canton or district in which they are situated, as, for example, the cantonal Technikum of St. Imier which has a school of clock and watch making and of micro-mechanics and a school of precision mechanics, or the Technikum of the town of Bielne which has an "Automobil Technike" section explained by the existence of the assembly plant of "General Motors" in Bielne, which has also 2 truck factories.	Secondary technical (b)	10-12/14
3-5	Trades school (Fachschulen) To be 15 years old	Eidgenössisches Fähigkeitstzeugnis (Federal proficiency certificate)		Full time	The "Technikum" generally require a complete apprenticeship and give pupils of 19-20 a theoretical and practical training. The "Technikum" of the canton of Schaffhausen operates in conjunction with that of Winterthur (Zurich) and pupils are transferred to latter at end of 1st year after sitting an examination.		
14. Adult Education		variable			Certain higher technical schools run evening courses for people who have acquired a federal proficiency certificate in subjects taught.	Adult education	
14.1. Abendtechniken -technicums du soir- Evening schools		No specific entrance requirements			There are several open universities in Switzerland providing courses in general cultural studies. Although the aim

14.3. Associations professionnelles (vocational associations)					of the open universities is to provide courses with a "cultural" bias, courses lasting several semesters are also provided, enabling participants to prepare for advanced courses in their spare time. Swiss open universities are run in a federalist spirit, within a cantonal or communal framework.	Adult education	
					Vocational associations run further training courses for adults in employment leading to the award of a certificate and master's certificate. Examination regulations must be approved by the Department of Education. The certificate examination is designed to test whether the candidate has the ability and knowledge necessary to carry out the function of manager or to run a small business. In the advanced vocational examination (examen de maîtrise) candidates must show they have the ability and knowledge necessary to fulfill the highest demands of their profession (manager, highly qualified employee, qualified accountant in charge of the accounting department of a large firm etc.)		
15. Higher Education					There are 7 universities, 2 polytechnical schools and a school of advanced social studies and economics and several other establishments of university level in Switzerland. Although each canton is independent in the field of education, the cantons which have a university could not themselves bear the total running cost incurred by them. The Confederation, therefore, grants considerable financial aid which is ever-increasing. Each university is dependent on the Department of education of its canton in matters of		
15.1. Universities	6-8 semesters old. "Baccalauréat" (13 for federal "maturité" or equivalent foreign qualification degree e.g.: Germany & Austria "Abiturium" or "Reifezeugnis". Spain: "Bachillerato superior" France: Baccalauréat

Scandinavian countries: "Student-Examen" Foreign diplomas considered equivalent do not however enable holders to sit the federal examination for medical professions	administration and finance but is completely independent in academic matters; there is complete liberty in teaching. Although each university has its own special characteristics their basic structure is the same and they are all divided into faculties: theology, law, medicine (with the exception of Fribourg and Neuchâtel) arts, science, economics and social science. Foreign students are freely admitted to Swiss universities in as much as they hold qualifications equivalent to those required of Swiss students.	Approximately 1/3 of the total number of students in Swiss universities is made up of foreigners. In all cantons with the exception of Geneva where primary, secondary and higher studies are free, matriculation and school fees must be paid. In most cantons there is a [cantonal] fund for higher education (e.g. Vaud) or an equivalent body which allocates grants to students whose parental income is below a given level. This system of grants is controlled by the federal law on the allocation to cantons, of subsidies for educational grants. This law is under review.	The university degrees awarded in Switzerland are the doctoral degree and the "licence", as well as various diplomas. As a general rule the Swiss German-speaking universities confer only the doctoral degree with the exception of a few faculties, whereas in the Swiss French-speaking universities the 1st degree ("licence") is required before preparing a doctorate. Special State examinations are held for a considerable number of professions (particularly in medicine, pharmacy, food chemistry, law and higher education). Students who do not have entrance requirements or who do not wish to be regular students can attend most

Teachers	Place of Training	Length of Study (in years)	Other Information
Nursery schools	Kindergärtnerinnen seminar (nursery school teacher's training college) Scuola magistrale (docenti case dei bambini)	2-3 years	Special school for pre-school teachers. Girls wishing to be admitted to the school must be 18 years old and have completed compulsory schooling and in some cases are required to have attended advanced courses in a vocational school. - In Berne, Luzern, Schwyz, Graubünden courses last 2 years (12/13th year of studies) - St Gallen and Solothurn: 2 years (10/11th year of studies) - Zug: 2 years (9/10th year of studies) - Aargau: 2 years (11/12th year of studies) - Vaud: 3 years (10/12th year of studies) - Ticino: 3 years (11/13th year of studies)
Primary schools	1. Universities (Geneva and town of Basel) 2. Lehrerseminar (Primary teacher training college)	2-3 years variable	Primary teachers are trained in the universities in Geneva and Basel-town. Candidates are required to have a secondary leaving certificate ("maturité"). Training is mainly concerned with teaching practice and methods. Training lasts 3 years in Geneva and 2 years in Basel. All the other cantons train their own teaching staff in teacher training colleges (Lehrerseminarien) providing both a more complete general education and the necessary training in pedagogy. At the age of 15 or 16, pupils enter the training college and generally after 4 or 5 years of training sit an examination qualifying them as teachers.
Special schools	Universities or equivalent (Fribourg, Geneva, Zurich)	2-3 years	Teachers of handicapped children are trained in the universities of Fribourg and Geneva where there are "seminaries" for special education. In Zurich such courses are provided in a private establishment of university level.
Secondary schools (1st cycle) (Sekundarschulen, Realschulen, etc.)	1. Universities 2. Special school training 1st cycle secondary teachers in the canton of St.Gallen	2 years	Students wishing to enter these training colleges must have a secondary leaving certificate ("maturité") or a primary teachers' certificate. Training last 2 years and is provided in the universities. The curriculum includes options in arts and science subjects.
Secondary schools (2nd cycle) (Mittelschulen, Gymnasien, Lyzeen etc.)	Universities	4 years	A university degree is necessary for teaching at the secondary 2nd cycle level. After sitting the leaving certificate examination ("maturité") candidates are required to have completed a university course of at least 4 years terminating with the award of either an arts or science degree. They then undergo training in pedagogy.

Teachers	Place of Training	Length of Study (in years)	Other Information
Other types of teaching:			
- Teachers in home management and domestic science	Handarbeits- und Hauswirtschafts-Lehrerinnen seminar or specialised sections of teacher training colleges	1-2 years	Entrance requirements: a complete apprenticeship (linen-drapery, sewing, dress making). Training in teaching methods last 1 or 2 years. In Basel, the "Frauenfachschule" provides a 2 year specialised training course at the end of which an examination is held and the cantonal teacher training college provides a 1 year course on completion of which there is an examination on teaching, practice and methods.
- Vocational teachers	Gewerbelehrg		Vocational teachers must have completed their apprenticeship and have several years of practical experience: they may hold an advanced federal degree (maîtrise), but all candidates are required to have undergone training in pedagogy in either a teacher training college or a vocational school.
- Art, music, singing teachers	School of Fine Art		
- University	University		There are several categories in the classification of university teaching staff. The requirements and criteria of recruitment vary from canton to canton. The following General categories may be distinguished: <u>Full professors</u> carry out basic teaching duties which represent a full timetable. They are generally appointed by the cantonal authorities on the recommendation of the university senate. The general recruitment procedure is that of "habilitation" or direct invitation and there is a compulsory age limit of 70. Professors of retirement age are generally nominated <u>emeritus professors</u> . In every university there are also <u>associate professors</u> who are appointed by the National Research Foundation and who divide their time between their personal research and teaching duties. <u>Extraordinary professors</u> carry out either basic teaching duties which do not represent a complete timetable or teach their specialist subject. They are appointed in the same way and according to the same criteria as full professors but for a period of 4 years which is renewable. <u>Lecturers</u> are appointed for a definite period.
			Junior Lecturers are appointed for a definite period of time and their appointment is renewable. Their main duty is to assist or to replace a professor in charge of practical work. "Lecteurs" carry out practical teaching duties and are appointed for a definite period of time. This appointment is renewable.

Teachers	Place of Training	Length of Study (in years)	Other Information
Federal polytechnical school	University		<p><u>Assistants</u> assist full professors, emeritus professors or associate professors in the preparation of their teaching duties and in their personal research work. The task they carry out is allocated to them by the professor under whom they work.</p> <p>"<u>Privat docents</u>" The title "privat docent" is conferred after the "habilitation". The "privat docents" are entitled to give students optional courses in specialised subjects. They are appointed for a limited period, which is subject to renewal by the faculty board.</p> <p>The teaching staff includes full and emeritus professors, lecturers, "privat-docents" and assistants. The teaching staff are appointed by the Government. Recruitment requirements and criteria are, in the main, the same as those required for the universities.</p>
